

## Measurable Business Impact

- ✔ 85% process accuracy
- ✔ Reduced waste and higher throughput
- ✔ Improved customer satisfaction
- ✔ 45% inventory reduction
- ✔ 60% faster reporting
- ✔ 30% lead time reduction

## Why Enterprises Choose This ERP

- ✔ Manufacturing-focused ERP design
- ✔ Scales from single site to global enterprises
- ✔ Proven automation-led efficiency gains
- ✔ Future-ready for evolving complexity
- ✔ Built for intelligent manufacturing growth

## Integration & Extensibility

- ✔ REST API-based modern architecture
- ✔ Easy integration with HRMS systems
- ✔ Hardware integration (scanners, RFID readers)
- ✔ Financial system integration
- ✔ Third-party application connectivity
- ✔ Future-ready, extensible platform

## Customization Without Core Risk

- ✔ Business-rule engine (no custom code)
- ✔ Upgrade-safe configurations
- ✔ Core ERP stability protected
- ✔ Process-aligned customization
- ✔ Workflow and approval chain configuration

## Security & Compliance

- ✔ Complete audit trails (user, timestamp, changes)
- ✔ Data encryption at rest and in transit
- ✔ Built-in regulatory compliance (SOX, FDA, ISO)
- ✔ Role-based access control
- ✔ Granular user permissions

## Implementation & Support

- ✔ Phased implementation approach
  - Foundation
  - Optimization
  - Integration
  - Innovation
- ✔ Manufacturing-focused implementation team
- ✔ Post go-live support and continuous optimization
- ✔ Low disruption, faster value realization

# Enterprise Manufacturing ERP

Automation-first ERP for complex manufacturing operations. Built for scalable, intelligent, and custom manufacturing businesses.

## Overstocking Prevention & Working Capital Control

- ✔ Rule-based maximum stock level enforcement
- ✔ Incoming stock validation against thresholds
- ✔ Exception-based approval workflows
- ✔ Overstock prevention by design
- ✔ Reduced carrying cost and improved cash flow

## Finance & Invoicing Integration

- ✔ Seamless procurement-to-payment flow
- ✔ Automated GRN to invoice generation
- ✔ Sales invoicing triggered after dispatch
- ✔ Accurate revenue recognition
- ✔ Accounting system integration
- ✔ End-to-end financial traceability

## Asset Lifecycle Management

- ✔ Complete asset lifecycle tracking
- ✔ Asset registration from acquisition
- ✔ Real-time asset location & status tracking
- ✔ Preventive maintenance scheduling
- ✔ Maintenance history tracking
- ✔ Asset disposal & retirement management
- ✔ Full audit trail for assets

## RFID-Enabled Smart Asset Tracking

- ✔ RFID asset tagging
- ✔ Handheld and fixed reader support
- ✔ Rapid asset verification (minutes, not days)
- ✔ Live asset visibility across facilities
- ✔ Suitable for IT assets, machinery, vehicles, and infrastructure

## Smart MRP & Procurement Planning

- ✔ Intelligent BOM-based material planning
- ✔ Automated BOM explosion
- ✔ Real-time stock vs requirement comparison
- ✔ Proactive material shortage alerts
- ✔ Net procurement calculation
- ✔ Buy only what is required (no excess purchasing)

## Automated Production Management

- ✔ Automated production order generation
- ✔ Business-rule driven manufacturing triggers
- ✔ Production aligned with real customer demand
- ✔ Fully linked sales orders and work orders
- ✔ Reduced manual intervention and errors

## Core ERP Value Proposition

- 01 Enterprise-Ready Manufacturing ERP
- 02 Built for Scalable, Intelligent, and Custom Manufacturing Operations
- 03 Designed for Stability with Flexible Intelligence
- 04 Automation-First ERP for Complex Manufacturing
- 04 ERP that adapts to your business (not the other way around)

## Sales to Manufacturing Integration

- ✔ End-to-End Sales-to-Manufacturing Automation
- ✔ Sales-Triggered Manufacturing Orders
- ✔ Make-to-Order Logic with Intelligent Rules
- ✔ Zero manual handoffs between Sales, Inventory, & Production
- ✔ Full Traceability from Order to Invoice

## Inventory Management & Visibility

- ✔ Real-time inventory visibility across all locations
- ✔ Live stock updates by material and warehouse
- ✔ Complete transaction tracking (GRN, issues, transfers, dispatch)
- ✔ Multi-warehouse inventory management
- ✔ Barcode and RFID-enabled inventory control
- ✔ Stock-driven core for reliability and traceability
